TANK Cleaning System: Equipment

TXClean™ JetSpray

The Tank Cleaning System **TXClean™** comes with different models and can be customized according to your requirements. Various equipment are also available for your tank cleaning solutions.

TXClean™ JetSpray is the compact hand-held spray gun for your daily tank cleaning routine, using a combination of compressed air and vacuum effect with cleaning solvent. JetSpray can spray the cleaning solvent into all areas of the tank shell evenly and effectively. It also helps to control the spray amount and prevent wastage of the solvent.
